

## List of scientific words and concepts

Speed of sound	Gravity	Speed of sound and light
Degrees centigrade	Surface area	Rainbow
Air pressure	Pressure	Seeds
Satellites	Surface area	Tree diagrams
Evaporation and water vapour	Sun rises in the east	Shooting stars
Salt crystals	Eureka	Meteorites
Diluted salts	Carnivorous	Earth's atmosphere
Water vapour	Camouflage	Circulatory system
Condensation	Mass and friction	Pulse and blood flow
Freshwater and salt water	Friction	Oxygen to sustain body
Horizon and sunsets	Forces	Rock strata
Focussing of light and lenses	Friction	Conversion of matter
Oxygen and lungs	Gravity	Potential energy
Tally charts	Tinder	Heat energy
Light spectrum	Mass	Circumference
Refraction of light	Friction	Iron and nickel metals
Rainbows prisms	Salt crystals	3000 degrees centigrade
Electric eels	Tally chart	Core
Volts	Light waves	Mantle
Solar eclipse	Speed of light	Crust
Friction	Phases of the moon	Iron and nickel metals
$F=MA$	Coral creation	Hydrogen sulphide
Balanced forces	Blue sky	Volcanic gases
Newton's laws of motion	Temperature of sun	Larva
Unequal forces	Iron ore	Changing state
Clockwise and anticlockwise	Magnetic	Energy transference
Degrees centigrade	North and South Pole	
	Making a compass	
	Thunder and lightening	
	Meteorites
